## Antivirus Solution

### Overview

An increasing challenge for today's IT solutions providers is delivering and managing effective protection against online threats and malicious software attacks to clients with different antivirus products. Onboarding new client locations with or without an existing antivirus solution, administrative difficulties with separate antivirus consoles and a lack of automated best practices for security updates further complicates IT threat prevention, detection and management.

True to its word, LabTech Software continues to deliver innovative and vendor-agnostic solutions driven by the day-to-day needs of IT service administrators and the managed service providers (MSP) community. Experience teaches us that one size does not fit all when you need to deliver complete, comprehensive coverage regardless of your clients' environment.

LabTech Software has teamed up with some of the most widely used and top-rated threat management solution providers to offer you the ability to choose exactly what you need to provide efficient and effective online and offline threat protection and management. LabTech's single-pane-of-glass Multivendor Antivirus Management Dashboard and managed security policies for antivirus reduce administrative burdens to ensure you enhanced service quality, productivity and profitability.

### Multivendor Antivirus Management Dashboard

The ever-competitive antivirus marketplace often offers promotional pricing resulting in different products deployed across multiple client sites and an array of un-integrated antivirus management consoles. Simply onboarding a new client compounds the situation. With LabTech's Multivendor Antivirus Management Dashboard, you can now manage multiple vendors across multiple sites from a single console.

### LabTech's Managed Security Policies for Antivirus

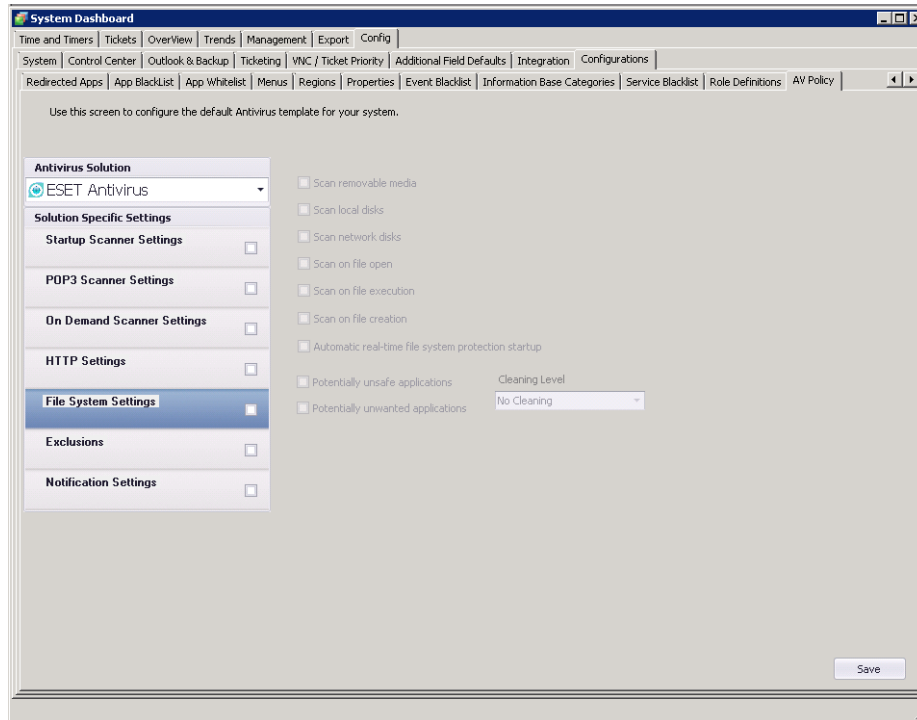

Managed security policies enhance LabTech's single-pane-of-glass antivirus management. This framework enables best practices to be easily created, applied and managed on existing and new client sites for multiple supported products. By centrally enforcing critical antivirus policies, you will strengthen your clients' security posture while efficiently addressing compliance requirements.

### ESET Integration

LabTech integrates with ESET Endpoint Solutions antivirus to provide a combination of powerful management tools, impressive performance and state-of-the-art proactive threat detection. Protect your clients' valuable data and ensure regulatory compliance with the award-winning ESET Endpoint Solutions. Deliver proactive antivirus and antispyware protection without affecting your clients' network performance, while offering business-grade management control. Beyond basic integration, ESET installs scripts, licensing and configuration through LabTech antivirus templates. In addition, partners can rely on first level support from LabTech for issues relating to ESET Endpoint Solutions.

## VIPRE Integration

LabTech integrates with VIPRE® antivirus to deliver fast and efficient online security with low impact on system resources. Built from the ground up after years of research and development, VIPRE is cost-effective, reliable, easy-to-use and easy to maintain—the perfect antivirus solution for your clients. With VIPRE, you can also thoroughly remove your previous antivirus product to avoid conflicts during installation. Beyond basic integration, VIPRE installs scripts, licensing and configuration through LabTech antivirus templates. In addition, partners can rely on first level support from LabTech for issues relating to VIPRE antivirus.

*Managed security policies enable best practices to be easily created, applied and managed for multiple supported vendors.*

## Benefits

LabTech's antivirus solutions provide today's IT solution providers with a tool that allows for efficient and proactive management of a variety of antivirus products across multiple client sites. Deliver superior antivirus protection and management services, from detecting online threats to protecting your clients' data integrity and network security, with an antivirus solution from LabTech Software.

- Establish policies per client and manage groups for increased efficiency.
- Carry out critical antivirus enforcement and management for effective service level agreement (SLA) compliance.
- View the status of all supported antivirus installations in your clients' environment at-a-glance.
- Increase operational efficiency and reduce service efforts by using a single console to manage multiple client sites and multiple antivirus vendor products.
- Provide your clients with comprehensive, instant deployment of an antivirus package to discovered unprotected systems.
- Purchase additional protection as needed and as your business grows.
- Ensure immediate protection and real-time monitoring against known and unknown online threats.
- Easily create, apply and manage best practices on existing and new client sites for multiple supported products.
