

LILIN Joins Forces on Large Car Dealership Renovation

LILIN USA teamed up with Clark Security Products, Dave Clark Construction, Alpha Electric, and Tom Bell Chevrolet to complete the largest renovation of any existing Chevrolet dealership to date.

Challenge & Solution

The primary goal of Tom Bell Chevrolet was to retain redundancy with the video backup in the case of a hard drive failure. To resolve this issue, LILIN provided a 36-channel (CMX1036) server with raid storage, offering a backup drive in the case that the primary hard drive should fail.

Other Products

On the camera side, LILIN provided over 30 HD IP iMEGAPRO models, including the IPD2322ESX3.6 flush mount domes and the IPR6122ESX3.6 IR domes for the show floor, the IPR7334ESX3.6 outdoor IR bullets to catch license plates on the driveway, and the IPS6224M 1.3MP PTZ's to tour the car sales lot. The dealership staff could access remote playback from all cameras in the facility's office.

Results

Tom Bell Chevrolet was very pleased with the image quality of their LILIN security system. LILIN USA is happy to create their ideal retail experience, and would like to thank all of those involved in bringing this project to fruition.
