

N-CENTRAL[®]

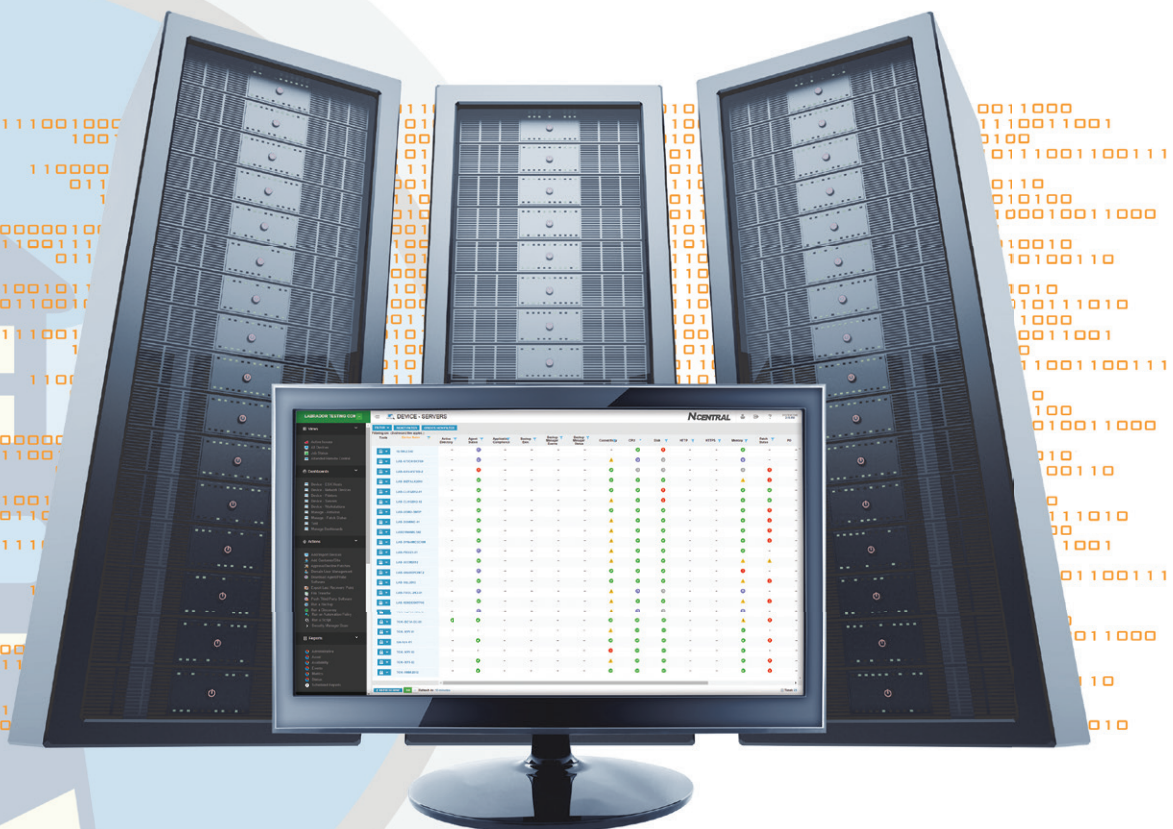

MONITOR. MANAGE. SUPPORT.

ALL-IN-ONE MANAGED SERVICES PLATFORM FOR BETTER IT SERVICE.

We've provided all of the tools and support that MSPs need to efficiently manage customers' environments and provide fast support without interrupting end users.

“I have yet to see any organization consistently stay in touch and deliver on what they say they are going to do the way N-able does. They are very, very service oriented.”

– Data Pro Solutions

AUTOMATED MONITORING & MANAGEMENT

As a service focused business you prioritize exceeding your customer expectations. N-central provides the tools you need to provide fast service in a repeatable way so all of your customers can receive the best service possible.

Automated Onboarding

N-central will automatically discover and onboard your customer devices and apply monitoring best practices.

Automated Setup

Automatically install antivirus and patches as well as configure backup.

Automated Reporting

Show your customers exactly what you're doing for them.

Automated Maintenance

Drag and drop interface lets you automate without any prior programming or scripting expertise.

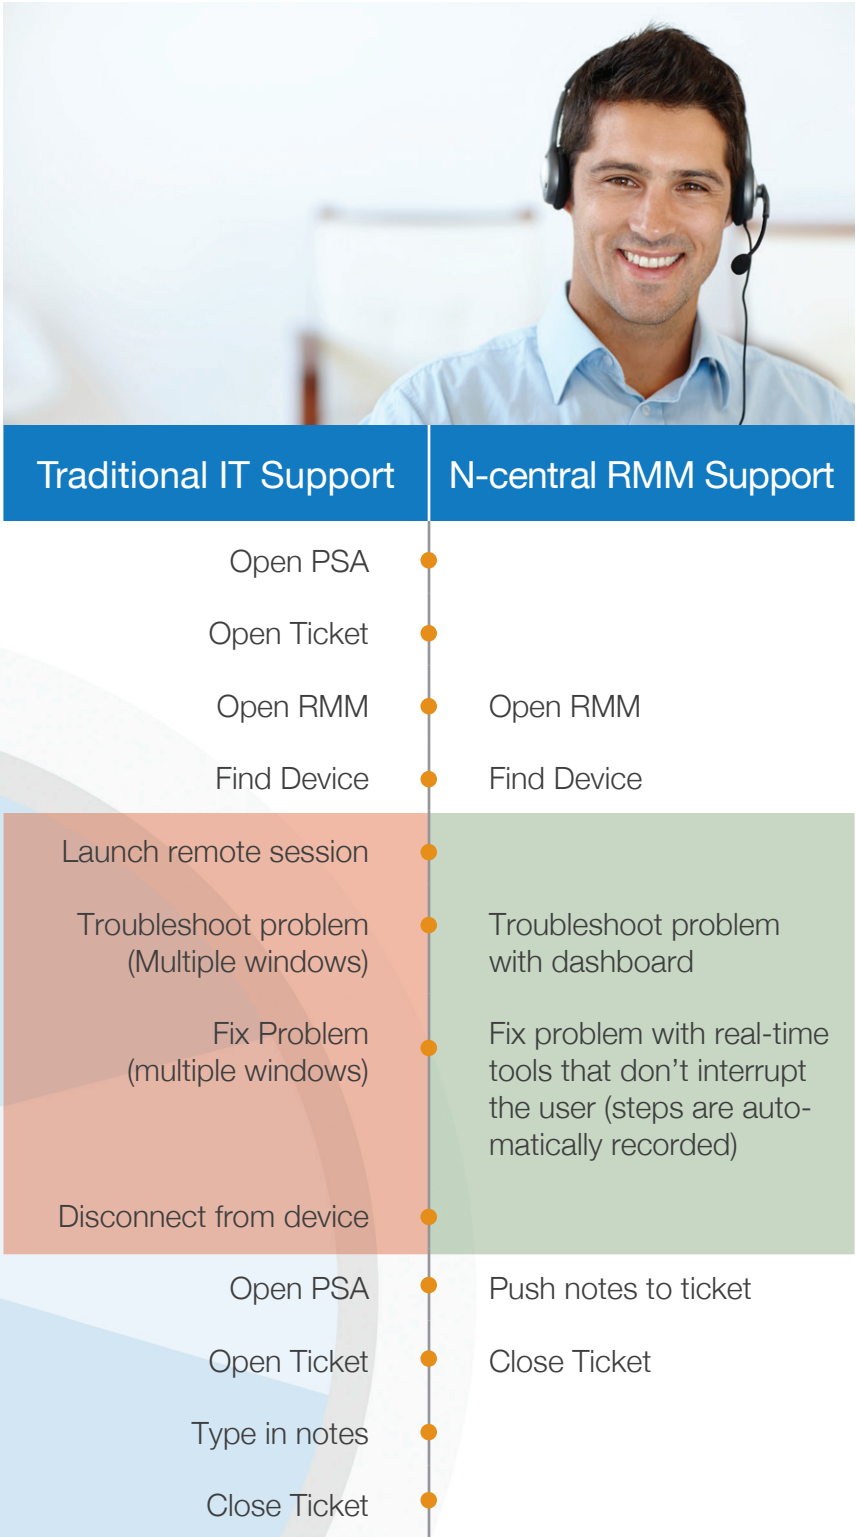

“With N-able’s Automation Manager, it’s astonishingly easy to script tasks – that’s a big help for our first and second level support technicians. There are a lot of possibilities ahead.”

– Oliver Kaspar, Co-Founder, Softbox

A BETTER WAY TO SUPPORT CUSTOMERS

MSPs have traditionally supported their customers using multiple tools and remote control sessions. Using siloed tools adds time to resolve issues and remote control interrupts the user and locks their machine for the duration of the support session. N-central helps you deliver faster service and a better experience for your customer.

SYSTEM REQUIREMENTS

Device Quantity	CPU	RAM	HDD
1,000	2 Cores	4 GB	75 GB
3,000	4 Cores	8 GB	150 GB
6,000	8 Cores	16 GB	300 GB
9,000+	<i>Additional configurations available on request.</i>		
Processor	Intel Xeon 55xx series or later		
Network	100 Mbps		
Operating System	Red Hat Enterprise Linux 6 (x64) Visit: http://hardware.redhat.com/ to verify server hardware is supported

N-able can host the N-central hardware and software so you don't have to worry about maintaining the infrastructure. Ask us about **Hosted N-central!**

FREQUENTLY ASKED QUESTIONS

What can I monitor with N-central?

N-central will automatically detect almost any IP connected device and with hundreds of built-in monitoring services we can monitor just about anything.

Can you help set up my first customer?

Yes. Our dedicated on boarding team can help you deploy to your very first customer using our best practice deployment methodologies.

Is it difficult to get started with automation & scripting?

No. Our drag and drop automation builder lets you build automation in minutes. No programming or scripting experience necessary.

Can N-central handle all of my customers' devices?

Yes. N-central is used by thousands of MSPs to monitor millions of devices. Some of our partners monitor as many as 25,000 devices.

What reports can be produced?

Up to 7 years of historical data can be stored and you can produce detailed technical reports to consultative & executive level business reports.

Can I remotely connect to customers through a Firewall?

Yes. Whether it's a firewall, or a roaming laptop we provide various methods for you to remotely connect to and support your customers.
