

LabTech Software is proud to be a partner-focused organization. Founded by system administrators with more than 20 years of hands-on experience as IT service providers, our mission—as IT solution developers—continues unchanged: To improve and enhance our award-winning remote monitoring and management (RMM) platform, empowering new and established IT service professionals to grow efficient and successful businesses.

## What is LabTech Ignite™?

LabTech Ignite was developed in response to our partners' requests for faster implementation times and a reduced learning curve. An IT industry exclusive built directly into LabTech, LabTech Ignite delivers:

- Pre-established processes to maximize the power of LabTech
- Built-in monitors and alerts based on Microsoft® best practices
- Default service plans, industry defined thresholds, auto-fix scripts, automated patch management and predefined searches
- Mac and Linux onboarding, role detection and critical service level monitoring for servers
- The highest level of automation out-of-the-box for any RMM solution on the market

## What is included in LabTech Ignite?

Industry experts and some of the most profitable managed service providers (MSPs) in the business worked jointly for more than 2,000 hours to develop the functionality that comprises LabTech Ignite. No other RMM solution developer has invested this measure of resources to develop and compile a virtual package of MSP industry best practices and expertise.

LabTech Ignite provides a unique out-of-the-box experience for IT service professionals. Designed to work with both small and large numbers of LabTech users (100 to 10,000 agents), the latest release can pull all basic information into one location for easier management and allows certain areas of LabTech Ignite to be turned on and off, allowing the partner to decide what level of functionality is best for their environment.

## What LabTech Ignite Delivers

Included Functions	Number of Presets
Schedules	3
Templates	34
Scripts	304
Groups	9
Subgroups	251
Searches	390
Internal Monitors Enabled	112
Remote Monitors Enabled	439+

LabTech Ignite ensures today's MSP a smoother out-of-the-box experience with minimal set-up and greatly improved ease-of-use. Get your MSP business up and running quicker and easier by taking advantage of the "pre-packaged" features and functionality in LabTech Ignite.

*"LabTech Ignite takes LabTech to a whole new level. The hundreds of built-in monitors ensure that we spend our time running our clients' networks proactively without worrying whether we've created a monitor for every little thing. All the monitors you need are already there!"*

Nate Gagne, Network Engineer  
Mainstay Technologies
