

# Most Advanced Ozone Water Treatment System

## Ozone:. Simplified

Complete, turn-key ozone process platform.

### Modular

The First Ozone Manufacturer to offer true modular capability.

### Reliable

Inherently reliable, with proven systems.

### Efficient

Proven 20-40% lower OPEX compared to conventional ozone systems.

## PINNACLE

The **PEAK-WTS** water treatment systems are available in process specific, skid configurations for water treatment applications. Designed for smaller commercial, industrial, municipal water, and process water applications, the **PEAK-WTS** systems are skid mounted for easy placement and operation. The systems feature standard water, on-board oxygen generations system, power, TCP/IP, and are ready to accept your facility connections. Each Peak system is configurable in 20 lb./day increments from 20 to 100 lbs. per day. All systems are made in the USA!

## PINNACLE Features

- Modular Ozone Cells
- Built In Redundancy
- Integrated High Frequency PSU & Controls
- Complete Ozone Process Instrumentation
- UL-508 Listed Enclosure w/touch safe Operation
- Ultra Compact Design

## PINNACLE Advantages

20-40% SAVINGS

**LOWEST OPEX** - We engineered an ozone production system that is fully automated, self protecting, and saves 30% more than the closest competitor.

30% MORE ENERGY EFFICIENT

**INTEGRATED** - You can save 20-40% on your existing ozone system operating cost when you switch to Pinnacle Ozone.

50% FOOTPRINT

**COMPACT** - 50% smaller footprint than comparable systems with simple 5-point installation.

5X REDUNDANCY

**REDUNDANCY** - Why settle for 100% redundancy when the smallest Pinnacle system can offer you over 500%?
