

OPERATING COSTS & CAPITAL

BIG CHALLENGES, SMALL BUDGETS

The reality of insufficient capital and frozen – or even decreasing – operating and maintenance budgets creates significant difficulties for wastewater treatment managers. Finding the best solutions at an economical price is the constant challenge they face.

SAVE MORE, DO MORE

To meet this persistent challenge, In-Pipe Technology® Company's proven pre-treatment process has consistently demonstrated its ability to dramatically reduce operating costs, freeing capital to pay for new equipment, plant upgrades, emergency maintenance and other unexpected expenses.

Across North America, In-Pipe Technology saves municipalities money by:

- Reducing sludge yield and associated disposal costs
- Lowering energy requirements
- Decreasing need for pump station and sewer line cleaning and maintenance
- Cutting or eliminating chemical use

Additionally, In-Pipe Technology makes wastewater treatment facilities more productive and effective. Our proven technology increases the life and utilization of costly wastewater infrastructure. This lessens the need for new taxes or user fees to pay for operational expenses and reduces the projected debt burden on proposed capital projects. Furthermore, our engineered process increases the performance and inherent treatment capacity of existing system designs, without increasing the cost to you.

Whether it is avoiding non-compliance fines from regulators, cleaning clogged sewers or keeping taxes and wastewater user rates in check, In-Pipe Technology is the cost-conscious answer to your community's needs.

THE IN-PIPE TECHNOLOGY ANSWER

Only with In-Pipe Technology can you reduce operating costs and capital expenditures *while you also* eliminate odors, increase plant capacity, limit corrosion, control FOG and reduce sludge production, all at no additional cost.

To speak with one of our experienced wastewater professionals about how In-Pipe Technology can deliver results for you, please call 1.888.325.5033 ext. 229, email us at costs@in-pipe.com or visit in-pipe.com.

A RISK-FREE SOLUTION – INQUIRE ABOUT OUR NO NET COST GUARANTEE

With our no net cost guarantee, you will never have a negative return on investment. If operating cost savings are less than our service fee, we will refund the difference. You can only save money with In-Pipe Technology; you can never lose it.

REAL SCIENCE. REAL RESULTS.
