LabTech Cloud

A Superior SaaS Based Remote Monitoring and Management Solution

Our Goal

At LabTech Software we embrace innovation and remain committed to staying at the forefront of the rapidly changing IT services industry. We continuously review our strategy and adapt our offering to meet the needs of today's IT services market. Our goal is to assist you in establishing and growing a profitable IT services business.

Most IT service providers—even newcomers to the business—know of the benefits and edge that a powerful remote monitoring and management (RMM) platform like LabTech can bring to their business. Dramatic increases in operational efficiency, technician productivity, improved customer satisfaction and the bandwidth to handle new business are almost guaranteed with the right setup and utilization of a robust RMM platform. All these advantages quite simply lead to a profitable managed services business.

Still, a lack of capital and resources prevent many IT service providers from establishing or expanding their IT services offering. Costly servers, increasing operating costs and a lack of time and other resources required to host software and customer data are but a few of the obstacles. LabTech Software, the leader in RMM, enables you to overcome these obstacles with LabTech Cloud.

What is LabTech Cloud?

LabTech Cloud gives you the same powerful, robust features as functionality as our on-premise RMM platform, delivered as an on-demand cloud service for a fraction of the cost.

If you've got the drive, the enthusiasm and the customers, but lack the resources for further investments, LabTech Cloud gives you the ability to expand your business at a minimum cost. A monthly subscription fee and convenient pay-as-you-go model make this an inexpensive and viable solution.

How Can I Try LabTech Cloud?

Accessing a free LabTech Cloud trial is extremely quick and easy. There is no need to download, configure, install and host your own server for testing. Simply complete our online form at labtechsoftware.com and within minutes you can login to a fully functioning LabTech server. And when you decide to move from trial to production, we can get you up and running immediately!

Enjoy full access to the rich set of LabTech RMM features and functionality through LabTech Cloud and leverage the power of remote process automation and increased efficiency with a minimum investment.

Who Needs LabTech Cloud?

LabTech Cloud is available to domestic and international IT service providers and managed service providers (MSPs) in need of an RMM platform delivered as a service, avoiding large investments on infrastructure and other resources. With virtually no time spent on setup and configuration, you can initiate operations and enjoy a return on investment (ROI) almost immediately!

LabTech Cloud Features
