Award-winning protection for your file servers

AVG File Server Protection
Preserve client and supplier confidentiality by protecting all critical business data located on your file servers.

AVG Anti-Virus, Resident Shield and AVG Smart Anti-Rootkit
Keep your workstations, networks, and employees safe from getting or spreading the latest viruses, worms, and Trojans.

AVG Anti-Spyware
Protect your classified business data and communications by identifying and removing tracking software like spyware and adware.

AVG Protective Cloud Technology
Identify current and emerging threats by employing multiple scanning engines and 'in the cloud' behavioral detection technology.

AVG Community Protection Network
Profit from fellow AVG users who share information regarding new threats.

AVG Threat Labs
Access detailed information regarding website security including clear and comprehensive website security reports, as well as information regarding your own site's safety status.

AVG Smart Scanning
Conduct full scans in record time as previously scanned files are ignored, saving you time and avoiding unnecessary slowdowns.

AVG Silent Mode
Offer all employees and IT administrators the opportunity to switch off unnecessary notifications on their workstations.

Deployment Cloning Technology
Facilitate rapid, time-saving installations and configurations across your networks.
