

Zebra Healthcare

**Bringing Visibility to Your
Healthcare Operations**

HIMSS 2015

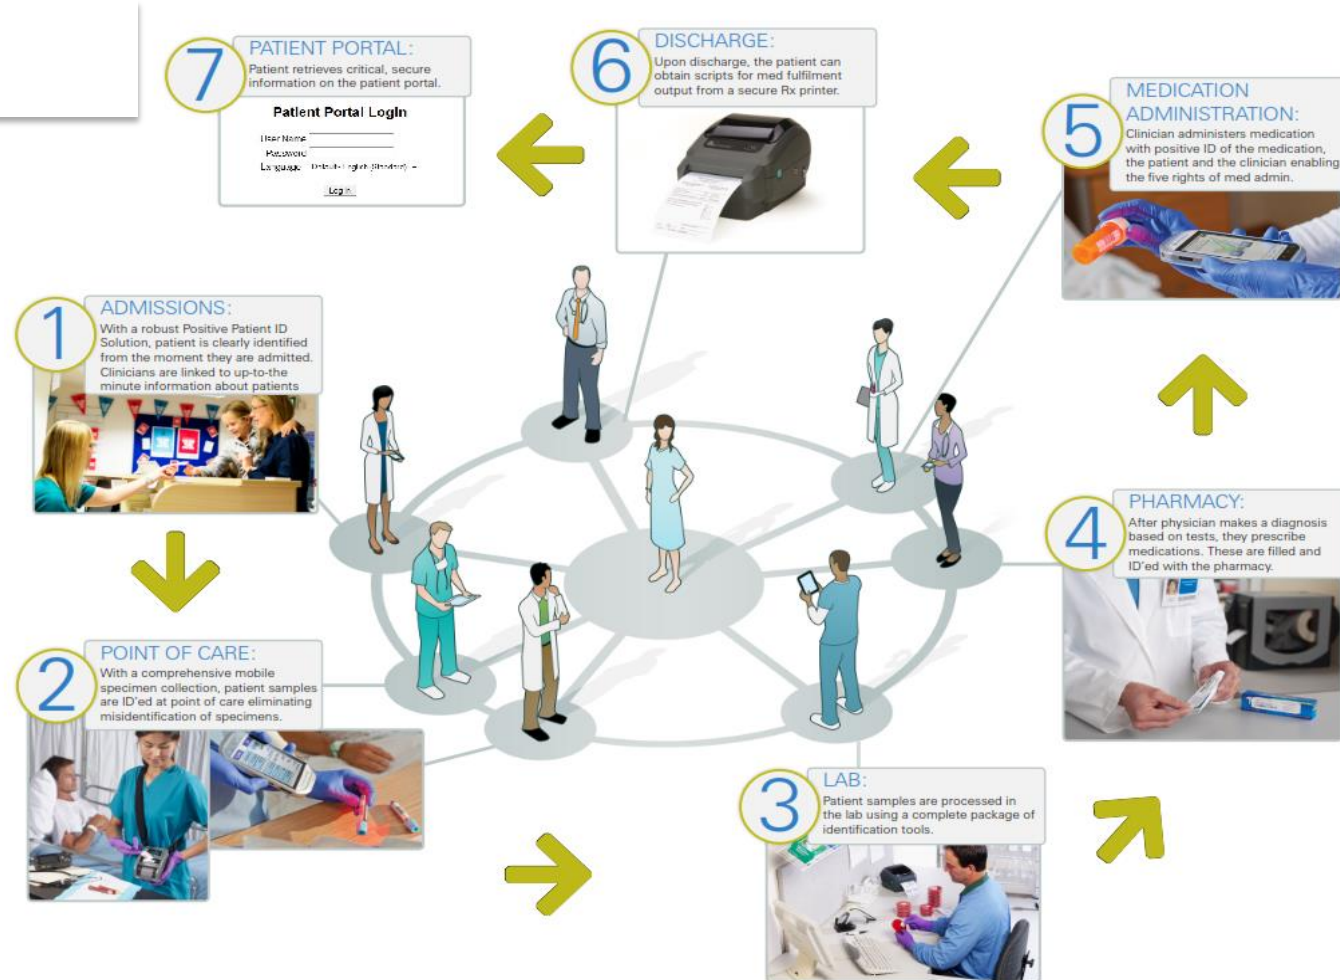

Macro Trends in NA Healthcare

- Need to treat the lifecycle of a patient
 - Shift from acute to chronic care
 - Shift from acute facilities to ambulatory and home
- Need for data – no big data without little data
- Staffing issues
 - Aging populations
 - Less clinicians to health
 - More clinicians are doing non-clinician activities
- Consolidation
 - More standardization in the IDNs

Three things that drive HC

- Money
 - Currently with the hospitals but shifting
- Mandates
 - As noted by the panel – know your regulations including but not only the ACA
- Volume – 35 million admissions in acute care but ambulatory will treat 2-3x more

One example of patient safety enabled by data capture

How we fit today: the Bridge to the EHR and Patient Safety

Patient, Assets, Operations, & Staff
Information

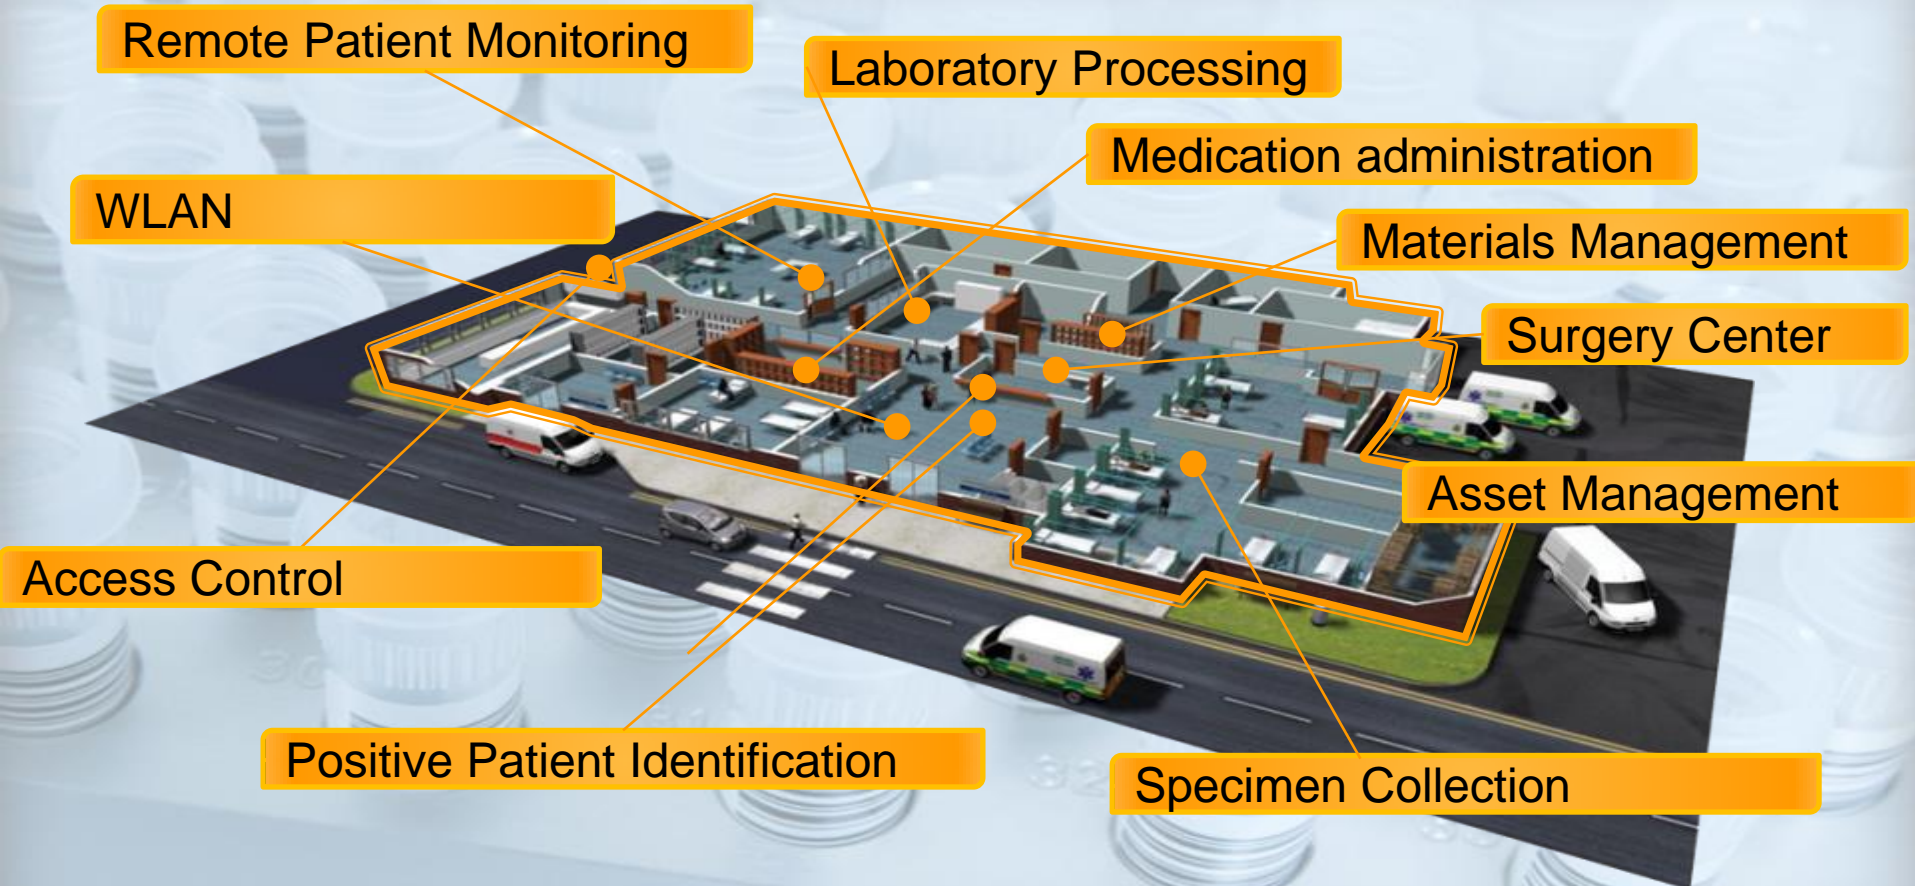

Solutions
Visibility

Health Systems and EHR

Where do our products fit?

Enhancing Patient Care

Safeguard Patient Safety in all areas of the facility

Positive Patient ID

Increase patient safety through all healthcare processes by easily identifying your patients from point of admission.

Specimen Collection

Ensure the right specimen is collected from the right patient at the right time and placed in the right container, ensuring the right results — and the right course of treatment.

Remote Patient Monitoring

Eliminating the time spent constantly traveling to either the central nursing station or the patient's room to perform critical tasks.

Medication Administrations

Enable nurses to administer medication more quickly and accurately, helping to avoid costly errors.

Pharmacy Management

Medications are scanned to immediately verify and record medication dispensing,

Increasing Operational Efficiency

Connect Caregivers and Track Patient Progress, Equipment, Facilities and Costs Effectively

Facilities and Asset Management

Providing complete automation of asset management while improving the quality and efficiency of the asset maintenance by locating equipment and scheduling maintenance quickly and easily.

Internet of Things Solutions (Zatar)

See all of your smart devices and easily connect them to the Internet using a cloud-based infrastructure.

Lab Administration

ID and Location patient specimens before, during and after processing

Improve Staff Productivity

Do more with the same number of staff by enabling workflow and communications enhancements

Staff Communications

Improve medical staff dialogue, ensure accurate records, and streamline diagnosis and treatment to prioritize time with patients instead of errands.

Location Solutions

Utilize RTLS to track the movements of your staff and provide helpful workflow enhancements.

Optimizing IT Operations

Focus on secure, simpler tools to make it easier to deploy applications and manage devices

WLAN Connectivity and Network Assurance Solutions

Delivering high-speed, reliable and secure connectivity and communications between healthcare systems with the simplified management, monitoring and protecting of wireless LAN network.

Guest/Patient Wi-Fi Hotspot and Bring-Your-Own Device (BYOD) Solutions

Facilitating the on-boarding and management of guest devices to provide easy and secure access to the wireless network for visitors and patients on the premises.

Services

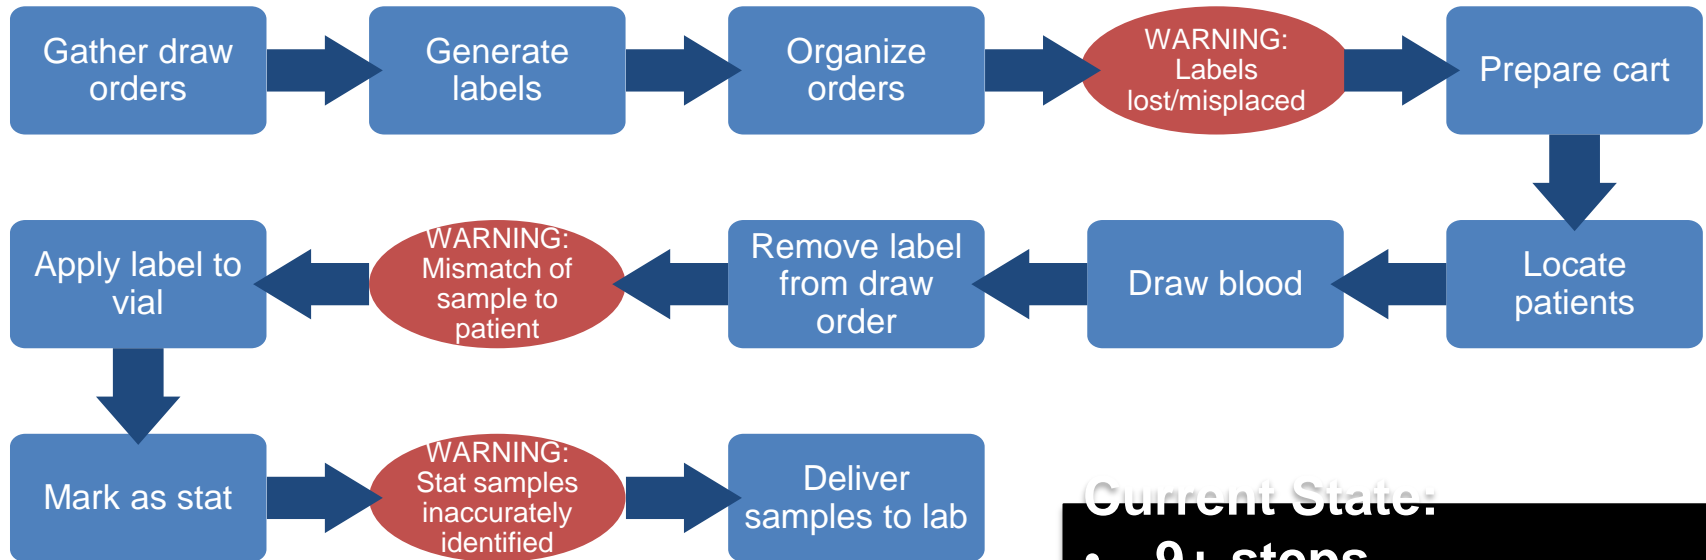

Software

USE CASE: Mobile Specimen Collection

Current State

Current State:

- 9+ steps
- Time consuming
- Vulnerable to human error

USE CASE: Mobile Specimen Collection

Future State

Clinician arrives at bedside and immediately scans patient wristband verifying patient ID

Blood or other specimen is drawn/collected

Label is generated using a mobile device and immediately applied to vial or sample encasement

Specimen label is scanned

Clinician badge is scanned

Future State:

- 5 steps
- Streamlined
- Accurate

How are we going to fit tomorrow?

- IoT Platforms
- Location in addition to identification
- Analytics
- Asset Intelligence

Decision Makers & Influencers

- Chief Information Officer – See profile
- Chief Technology Officer
- IT Directors (seamless integration, budgets, business value)
- Chief Nursing Officer (employee morale, enhance patient experience and reduce cost) – See Profile
- Clinical Informatics Director / Chief Nursing Information Officer
- Chief Medical Information Officer – See Profile
- Laboratory Director: Influencer (Performance) – See Profile
- Pharmacy Director: Influencer (Performance)
- Registration/Admitting Director: Influencer (Performance) and User (Efficiency)

Questions for Potential Resellers

- What EHR system are you utilizing in your facility?
- What are you doing to identify your patients?
Specimens? Medications?
- What are you doing to identify your assets,
particularly medical devices?
- How are collecting data about your patients and
devices today?

What it takes – optimal reseller

- Focused sales team
 - This does not work by sending the retail rep to a hospitals
- Focused Subject Matter Expert
 - Not a sales rep, a workflow and HC consultant
- Software expertise – both Zebra's but really knowledge of the hospital operating systems and EHRs
 - Focusing on different areas of the hospital, with different ISVs
- Patience
 - Healthcare sales take a LONG time to come to fruition
